DGJX

DISC AND CYLINDER SEPARATOR

The DGJX is a type of separator used for the separation and classification of grains. It can remove long impurities such as oats, barley, wild grass, and other small impurities such as black seeds. DGJX combined separator is designed based on Disc type separator and cylinder type separator, which is characterized by shortened process line, high output, optimal separation effect and small space occupation, etc.

Model		DGJX-63-YQB				DGJX -63-YQN		
Disc	OD (mm)	Ф630			Ф630			
	Hole detail	5.5	6	8A	8B	6	8A	8B
	Disc qty	6	12	5	10	18	5	10
Disc speed (rpm)		54-56r/min						
Cylinder speed (rpm)		54-56r/min						
Power (kw)		4kw						
Air suction volume (m³/min)		10-15m³/min						
Weight (kg)		1750kg						
Capacity (t/h)		6-8t/h				8-10t/h		
	Outline size L×W×H (mm)	2947×243×2034
