INFESTATION DESTROYER

Infestation destroyer is an essential equipment for both large and small flour mills. The machine is utilized to destroy live insects and insect eggs in order to control infestation therefore prolonging flour shelf-life. Installed within positive pressure blowline(s) going to or coming from flour storage bins.

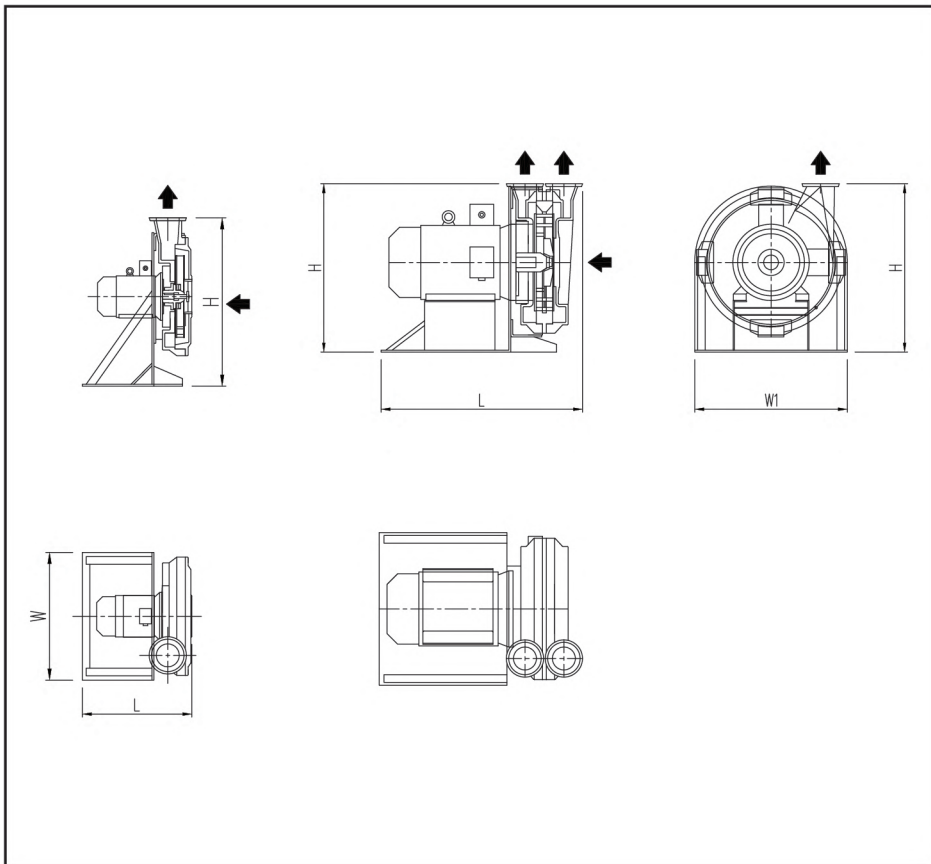

Our special manufacturing process ensures that the machine can be operated at high speed but with little vibration and noise level. Raw materials are carefully selected, heat-treated to ensure smooth running, low maintenance and longevity.
