

CXFD

VERTICAL ASPIRATION SEPARATOR

This machine can be used for cleaning raw materials in all kinds of food processing plants and feed plants. It is suitable for separating dust, husk, particles and light impurities from wheat, rye, oats, barley, soybean, peanut, corn, cocoa beans and other granular materials.

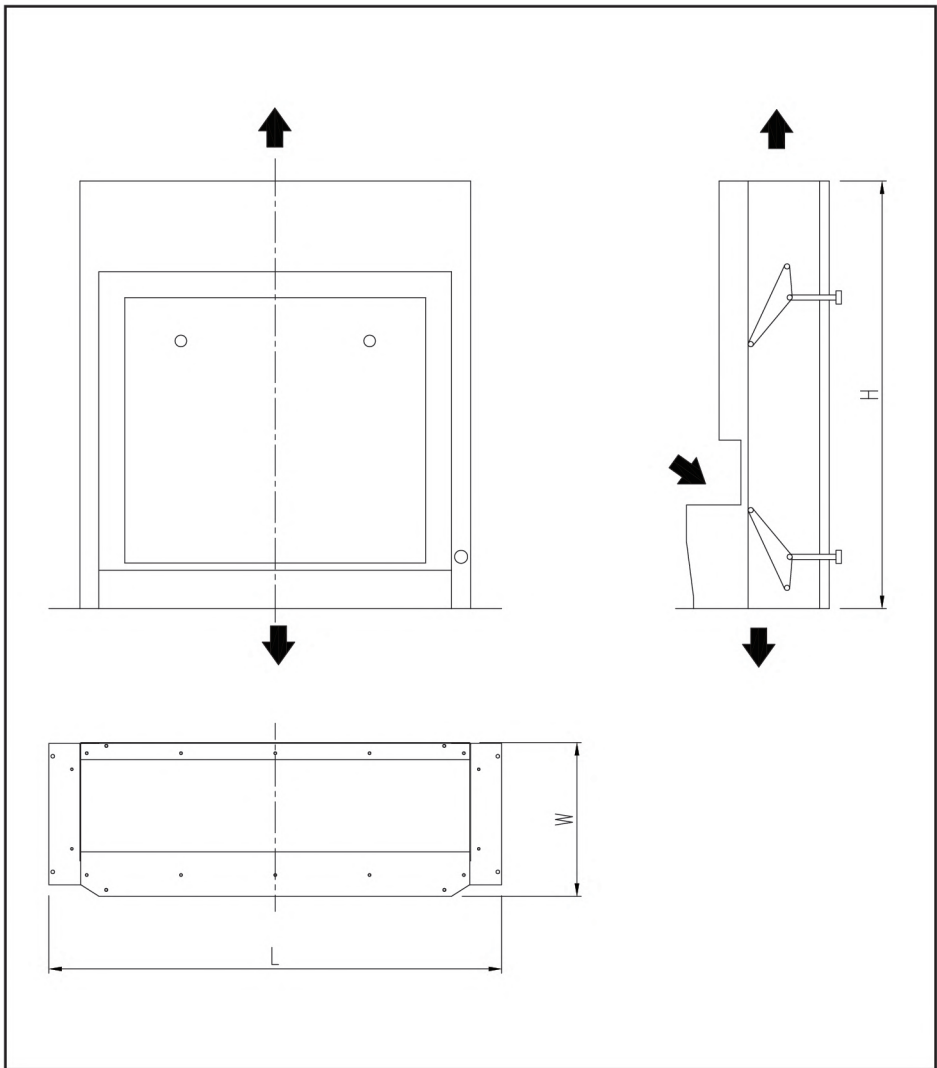

- a. Through the organic glass observation window on the wallboard behind the rack, observe the winnowing of equipment. Adjust air volume at any time to ensure that equipment used reach the best state.
- b. Feeding has the adjusting device. According to the volume of incoming materials, adjust the space of air adjusting plate and uniform material plate at any time to improve the separation effect.
