

DGJX

DISC AND CYLINDER SEPARATOR

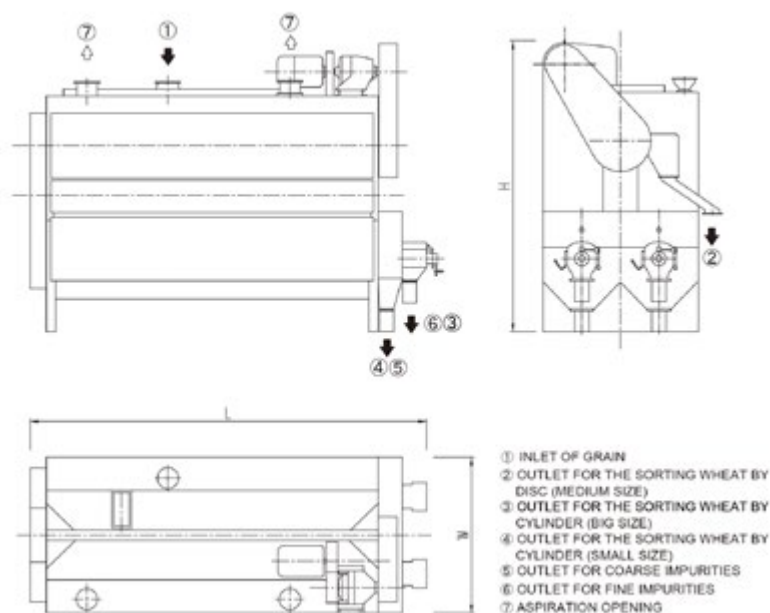

This DISC AND CYLINDER SEPARATOR is designed for efficient separation and classification of grains—capable of removing long impurities such as oats, barley, and wild grass, as well as smaller contaminants like black seeds. The DGJX integrates disc-type and cylinder-type separation technologies, resulting in a shortened process line, high output, optimal separation performance, and minimal space requirements.

It is a compact and powerful solution for modern grain cleaning systems.
